CAREER OBJECTIVE

Junior Full-Stack Developer skilled in Next.js, Node.js, Express.js, and MongoDB, with three deployed projects featuring secure authentication and REST APIs. I write clean code and build responsive interfaces. I'm seeking an entry-level full-stack role where I can contribute to real projects and keep growing.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, shadcn/ui
- **Backend:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB
- **Authentication:** Better Auth, JWT
- **Tools:** Git, GitHub, VS Code, Postman

PROJECTS

1. HandsTogether | Social Development Events Platform Live Demo | GitHub

A full-stack platform for finding, creating, and joining community events such as tree plantations, food donations, and cleanups.

- Built REST APIs for event creation, management, filtering, and volunteer participation.
- Secured event management with JWT-protected routes and server-side ownership checks.
- Added event joining with duplicate-join prevention and capacity validation.

Technologies: Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Better Auth.

2. Wanderlust | Travel Booking Platform Live Demo | GitHub

A full-stack travel booking platform where users can explore destinations, manage travel bookings, and organize their trips through a responsive interface.

- Developed destination browsing, search, filtering, and detailed destination pages.
- Implemented booking management with upcoming and past booking views and cancellation functionality.
- Integrated email/password and social authentication using Better Auth.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Better Auth.

3. The Daily Brief | News Portal Live Demo | GitHub

A responsive news platform that organizes BBC Bangla news articles into categories and provides readers with an accessible editorial-style browsing experience.

- Developed dynamic category pages, individual article details, and a most-read news section.
- Integrated the BBC Bangla News API to retrieve articles, categories, and featured stories.
- Implemented email/password and Google/GitHub authentication using Better Auth.

Technologies: Next.js, TypeScript, Tailwind CSS, Better Auth, BBC Bangla News API.
